

Environmental News and Media

Project Title	Environmental News and Media
Project Summary	Compile digital daily news clips covering a range of topics including oceans, climate change, water, science, conservation, and health. News clips come from a variety of international and domestic media sources.
Country	United States
Agency	Department of State
DoS Office	OES/PPO
Post	N/A
Section	N/A
Number of Interns	1

Project Description

The Bureau of Oceans and International Environmental and Scientific Affairs (OES) works on a variety of environment, science, technology and health issues that impact millions of U.S. jobs and advance U.S. foreign policy and national security interests. OES builds international consensus around issues like fighting infectious diseases, and combating wildlife trafficking and illegal, unregulated and unreported fishing. OES also promotes water security, peaceful cooperation on polar issues, sustainable ocean policy, and science and technology cooperation, among other vital topics.

The VSFS eIntern will be responsible for performing a daily comprehensive news search and compiling news clips for OES. The eIntern will search a wide variety of online news sources for stories and subjects relevant to our mission. The clips have an international and national focus and are used to inform hundreds of Department of State employees, including senior officials, of the latest environmental and scientific news. Clips will be compiled daily except on weekends and Federal holidays.

Desired Skills Interests

Additional Information

It would be preferred to have an eIntern who has an interest in environmental science and/or media and communications.

Language Requirements

None
